KOMAL7466

Passionate Full-Stack Developer with 3+ years of hands-on experience in WordPress development, digital marketing, Passionately transitioning into Python AI/ML with a recent projects integrating Google Gemini API , OpenAI for intelligent applications. Looking to leverage diverse technical and creative skills in AI-focused development roles.

SKILLS

Frontend

HTML, HTML5, CSS, Jinja2 , WordPress , CSS3, JavaScript, Bootstrap. Tailwind CSS, Framer Motion, Three.js (Basic 3D), React (Basics), Next.js

Backend

Python, Flask, CRUD operations,FastAPI, REST API Google Gemini AI, LangChain (Basics), Machine Learning (Basic concepts), Prompt Engineering, CORS, Middleware Auth

Tools

Render,Git, GitHub,Vercel, Postman, VS Code, FTP Servers, GitHub Actions, Photoshop, Canva,V0, Loveable,Cursor.AI,ChatGpt,Google Gemini,N8N(BASIC)

Databases

SQL, SQL Server Management Studio (SSMS). PostgreSQL (Basics)

EDUCATION

Graduation - Bachelor's in Science(IT) LPU , pursuing M.Sc (IT)

AI/ML PROJECT (Personal/Client Work)

AI-Powered CA Assistant | *Next.js, FastAPI, Google Gemini AI*

March 2026

Developed a full-stack AI application for a Chartered Accountant firm featuring a virtual assistant

Integrated Google Gemini 1.5 Flash API with custom system prompts for CA-specific financial advisory

Built real-time chat interface with message history and typing indicators using Next.js

Implemented document upload & analysis – image analysis with Gemini Vision, PDF text extraction with PyPDF2

Created 3D interactive UI using Three.js and Framer Motion for modern user experience

Solved complex hydration errors and CORS issues ensuring smooth frontend-backend communication

Deployed frontend on Vercel and backend on Render with environment variable security

Tech Stack:- **V0, Next.js, TypeScript, Tailwind CSS, FastAPI, Python, Gemini AI, Git**

Key Achievement:- **Successfully integrated AI into professional CA services, reducing query response time and providing 24/7 automated assistance.**

PROFESSIONAL EXPERIENCE (3 + YEARS)

Web & WordPress Developer | Anthem Infotech Pvt. Ltd. (Nov 2024 - Present)

Web Project Contributions (Anthem Infotech Pvt. Ltd.)

- **At Anthem Infotech, I actively worked on multiple WordPress-based web solutions, focusing on both frontend design and functional implementation using Elementor and core WordPress tools:**
- **Appointment Booking Website: Designed and developed a dynamic appointment booking system using Elementor. Integrated form handling, calendar management, and user notifications for seamless scheduling.**
- **Logistics Business Website Built a responsive website for a logistics company, with sections for service listings, quote requests, and contact forms. Emphasized UX/UI and mobile optimization.**
- **Landing Page Development: Created a high conversion landing page for a promotional campaign using Elementor, with custom sections for client testimonials, service highlights, and call-to-action forms.**
- **MMP Client Panel – Provides a dashboard to manage expenses, track loans, monitor savings, and check home loan tenure.**
- **CRM Admin Panel – Enables admins to manage leads, follow up via SMS, generate PDFs, oversee staff, and handle property management.**

WordPress Developer & Digital Marketing Intern| Softdeviser (Feb 2023 – Oct 2024)

- **<u>WordPress Development:</u>**

Developed and maintained 5+ WordPress websites including client projects like Fibax Pharma (https://fibaxpharma.com) and HomeRento (https://homerento.com)
- Built custom landing pages, service sections, and contact forms using Elementor and core WordPress tools
- Implemented responsive designs ensuring **mobile compatibility and optimal user experience**

- Managed plugin integrations, theme customizations, and regular website backups

Digital Marketing & SEO:

- Handled **on-page SEO – meta tags, site structure, schema markup, and keyword optimization**
- Implemented **off-page strategies including backlinking and guest posts**
- Used **Google Search Console, GTmetrix, and analytics tools for performance monitoring**
- Converted technical features into **customer-friendly messaging for marketing campaigns**

- **Used **Google Search Console, GTmetrix, and analytics tools for performance monitoring**

Creative Design:

- Created **brand-aligned visual content using Photoshop & Canva – banners, social media posts, blog graphics**
- Produced **promotional and tutorial videos using screen recording tools and Canva**
- Designed graphics for client campaigns and product showcases

Project Coordination:

- Coordinated **full-cycle web projects – from client requirement gathering to final deployment**
- Collaborated with designers and developers to ensure **on-time delivery and client satisfaction**
- Assisted in technical structuring, content placement, and functionality planning

Key Projects:

Fibax Pharma – E-commerce pharmaceutical website with product listings and secure payment
HomeRento – Property rental platform with listing management and inquiry forms
- Multiple corporate and portfolio websites

PERSONAL EXPERIENCE
(hidden-gems)

Project Name- Hidden Gems – AI-Powered Travel Recommender | Python/Flask + ML

Key Highlights:

- Developed a Flask-based web app with dual login (Admin/User) for travel destination discovery

- Implemented Machine Learning recommendation system using user behavior analysis (collaborative filtering)

- Integrated basic ML algorithms to suggest hidden tourist spots based on user preferences

- Built responsive UI with Jinja2 and Bootstrap

- Added revenue-generating advertisement module for local businesses

TechStack: Flask,Python,Jinja2,Bootstrap,Rest APIs,ML (basic modules)

Other Projects:-

Netflix Clone | *HTML, CSS, JavaScript
Built a responsive frontend clone of Netflix with movie cards and hover effects
Focused on UI/UX and cross-browser compatibility

CERTIFICATIONS & LEARNING

Google Gemini API Integration – Hands-on project implementation(self-learning)
Prompt Engineering Basics – Crafting effective AI system prompts(self-learning)
Machine Learning Fundamentals – Regression, classification, recommendation basics(self-learning)
Python for AI/ML – NumPy, Pandas,Scikit-learn,PyPDF2,Pillow (PIL), basic data manipulation (self-learning)
SEO Certification*– On-page and off-page optimization techniques
WordPress Development – Theme customization, Elementor pro
Graphic Design – Photoshop & Canva certified

KEY ACHIEVEMENTS

Technical: **Built and deployed AI-powered application with real API integration**
WordPress: **Developed 7+ websites including e-commerce and corporate platforms**
SEO: **Improved client website rankings by 40% through optimization strategies**
Coordination: **Successfully managed 5+ full-cycle projects** with 100% on-time delivery**
Design: **Created 50+ marketing materials – banners, social posts, videos**
Problem Solving: **Debugged **10+ complex issues** including hydration errors and CORS**
Learning: **Transitioning from WordPress to **Python AI/ML** with practical project experience**
